Plant species

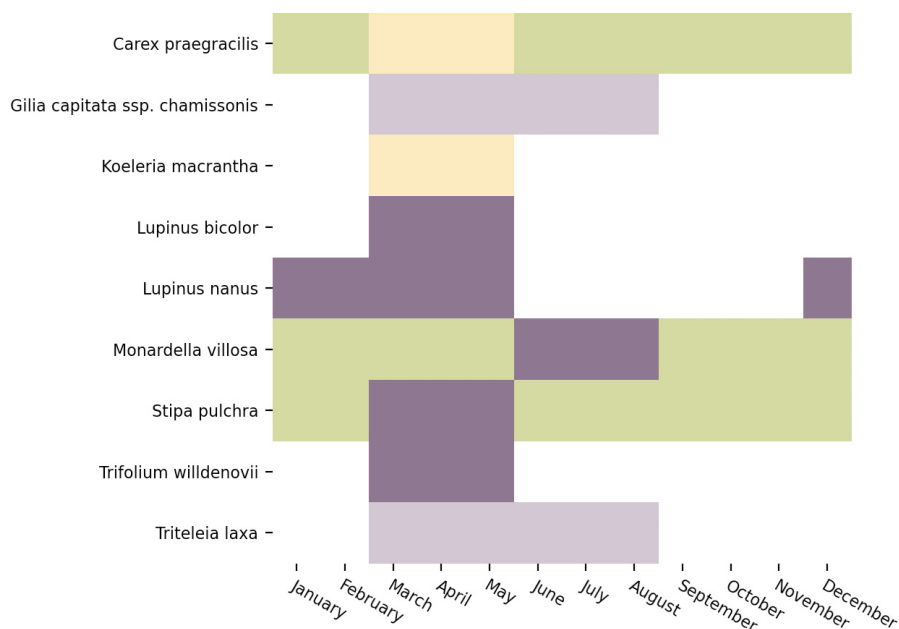

Landscape inspiration:

An oak grassland where green and golden grasses provide a foil for seasonal inflorescence and structural oaks.

Our design response to test:

- Matrix of evergreen and rhizomatous *Carex praegracilis* as a groundcover layer for random smatterings of annuals and herbaceous perennials such as *Triteleia laxa* and *Monardella villosa*, providing seasonal interest.
- Taller and more seasonally dynamic and ethereal grasses such as *Stipa pulchra* and *Koeleria macrantha* serve as filler and structural planting.

Anticipated plant colors during year:

Plant list:

Groundcover Layer (50%)

Clustered Field Sedge (*Carex praegracilis*)

Filler Species, broadcast as seed (5-10%)

Miniature Lupine (*Lupinus bicolor*)

Sky Lupine (*Lupinus nanus*)

Dune Gilia (*Gilia capitata ssp. chamissonis*)

Tomcat Clover (*Trifolium willdenovii*)

Seasonal Layer (25-40%)

Ithuriel's Spear (*Triteleia laxa*)

Coyote Mint (*Monardella villosa*)

Structural Layer (10-15%)

Prairie Junegrass (*Koeleria macrantha*)
