

Potrero Hill

Eco-Patch

Open Garden

Sunday April 18th
10am - 12pm

The Eco-Patch Demonstration Garden is intended to showcase the ecological and aesthetic benefits of habitat restoration. The Test Garden was planted in November and December of 2020 and is the first phase of the project. It is currently being monitored for habitat value and aesthetics.

As a goal is to inspire more people to use these plants we'd like to invite you to an open garden day! The Eco-Patch is located on the west side of Vermont Street between Mariposa Street and 17th Street in San Francisco. Get a chance to see these plants up close and talk to the neighbors involved with it's design and implementation.
