Plant species

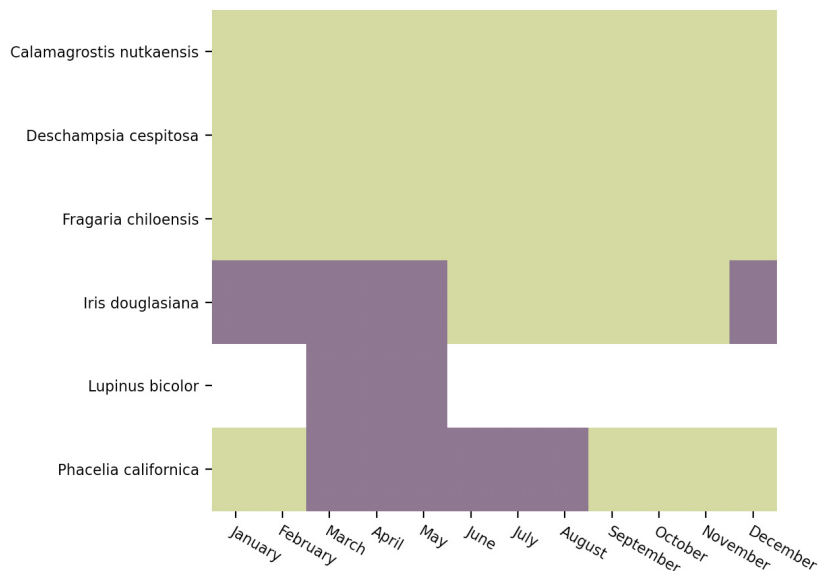

Landscape inspiration:

A landscape of glossy green colors contrasting with fine grasses/ grass-like textures, with fountain and vase shape plants emerging from the groundcover layer in distinct tufts.

Our design response to test:

- Use groundcover plants with glossy textures that will create a homogenously flat layer.
- Leave enough space between grasses / clusters of grasses so the structural plant form is visible.

Anticipated plant colors during year:

Plant list:

Groundcover Layer (50%)

Beach Strawberry (*Fragaria chiloensis*)

Filler Species, broadcast as seed (5-10%)

Miniature Lupine (*Lupinus bicolor*)

Seasonal Layer (25-40%)

Douglas Iris (*Iris douglasiana*)

California Scorpionweed (*Phacelia californica*)

Structural Layer (10-15%)

Pacific Reedgrass (*Calamagrostis nutkaensis*)

Tufted Hairgrass (*Deschampsia cespitosa*)
