

Eco-Patch OPEN GARDEN

June 17, 2023, 2:00 – 4:00

West side 400 Block Vermont Street

Planting Pollinator Gardens in NW Potrero

- **Join us Saturday afternoon** to find the CA native plants that will work in your backyard.
- Check out which plants will grow in the sun or shade.
- Check out the three groundcover species that have beaten out the weeds.
- Download **iNaturalist** on your phone ([inaturalist.org](https://www.inaturalist.org)), sign up and learn how to use it with us.

Rock Phacelia

Dune Sagewort

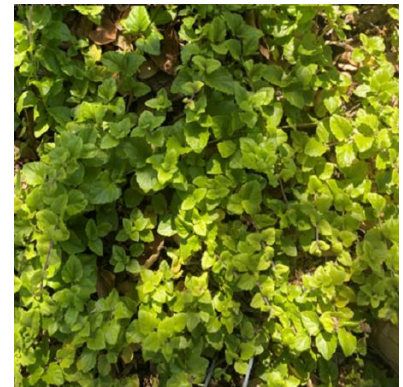

Seaside Daisy

Why Do this?

- **Birds, butterflies, bees and other insects move pollen from one NATIVE plant to another, enabling growth and reproduction of new plants.**
- **35% of our food grows as a result of the work that pollinators do.**
- **Our pollinators have been threatened by many things, but foremost is the loss of the native plants that they need.**

Sea Thrift

Yerba Buena

Seaside Woolly Sunflower
